About myself

2007

BSc Computer Science + Mathematics
(University of Utrecht)

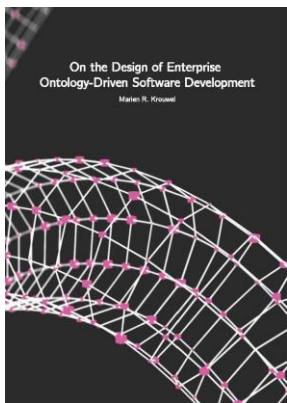

2011

MSc Computer Science – Information Architecture
(TU Delft & University of Antwerp)
Started working at Capgemini

2023

PhD '[On the Design of
Enterprise Ontology Driven
Software Development](#)'
(University of Maastricht)

Co-founded [Trives](#)

Overview

- 
- 1 Numerous 'typing' errors
 - 2 Added revocations of decline and reject (Ch. 8)
 - 3 D-organization split into D for documents and M for files (Ch. 11)
 - 4 ARS: with clause replaced by given clause (Ch. 12)
 - 5 Added real-life application (Sec. 19.10)

Example of minor change: OMEGA (Ch. 10)

	tangible things	intangible things
creating and changing	manufacturing, changing, repairing (movable and immovable) goods	making and adjusting decisions, advices, judgements, etc.
transporting and storing	transporting and storing goods or files	*not applicable*
transferring ownership	buying/selling goods	acquiring owner rights, paying, trading shares
obtaining usufruct	hiring/renting space-time capacities	using intangible things, like SaaS, movies, etc.

Table 10.2 Product categories

Example of minor change: GloLog (Ch. 18)

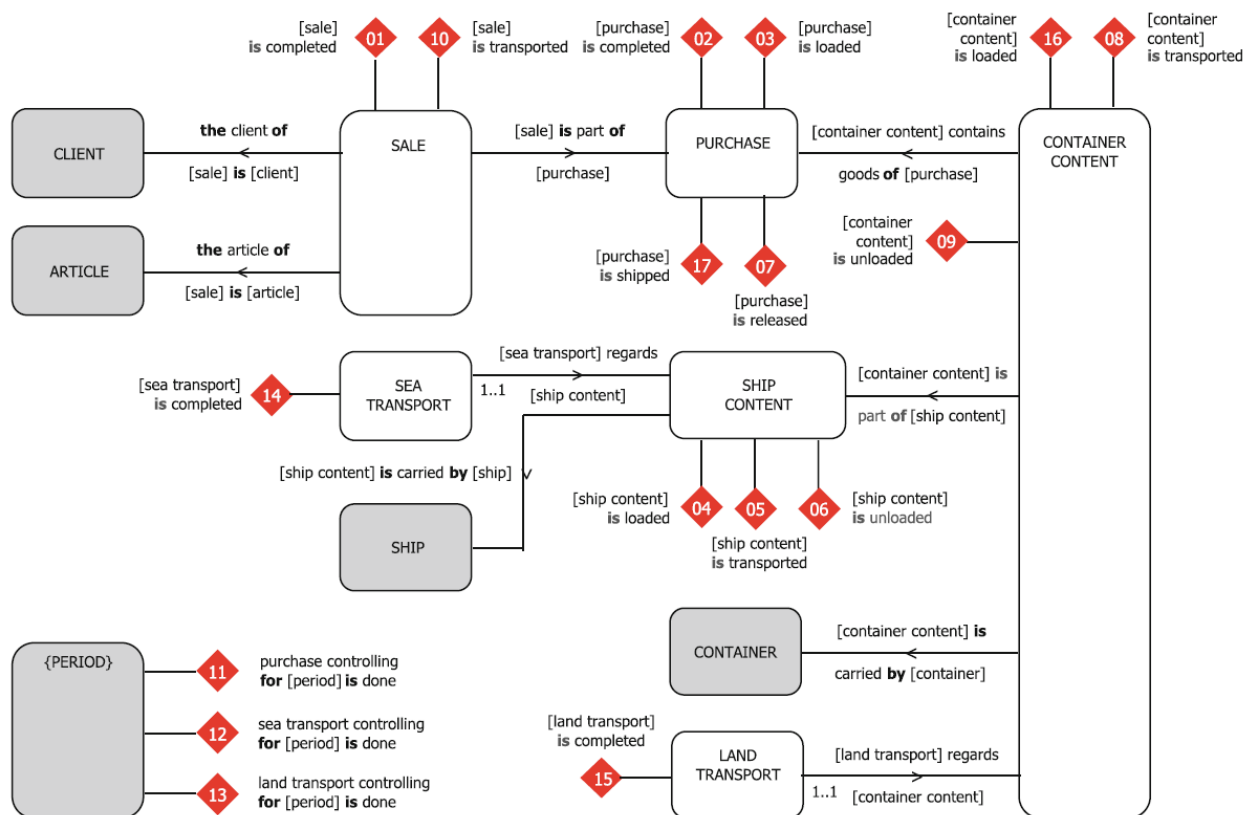

Fig. 18.16 OFD of the GloLog organization (2020 edition)

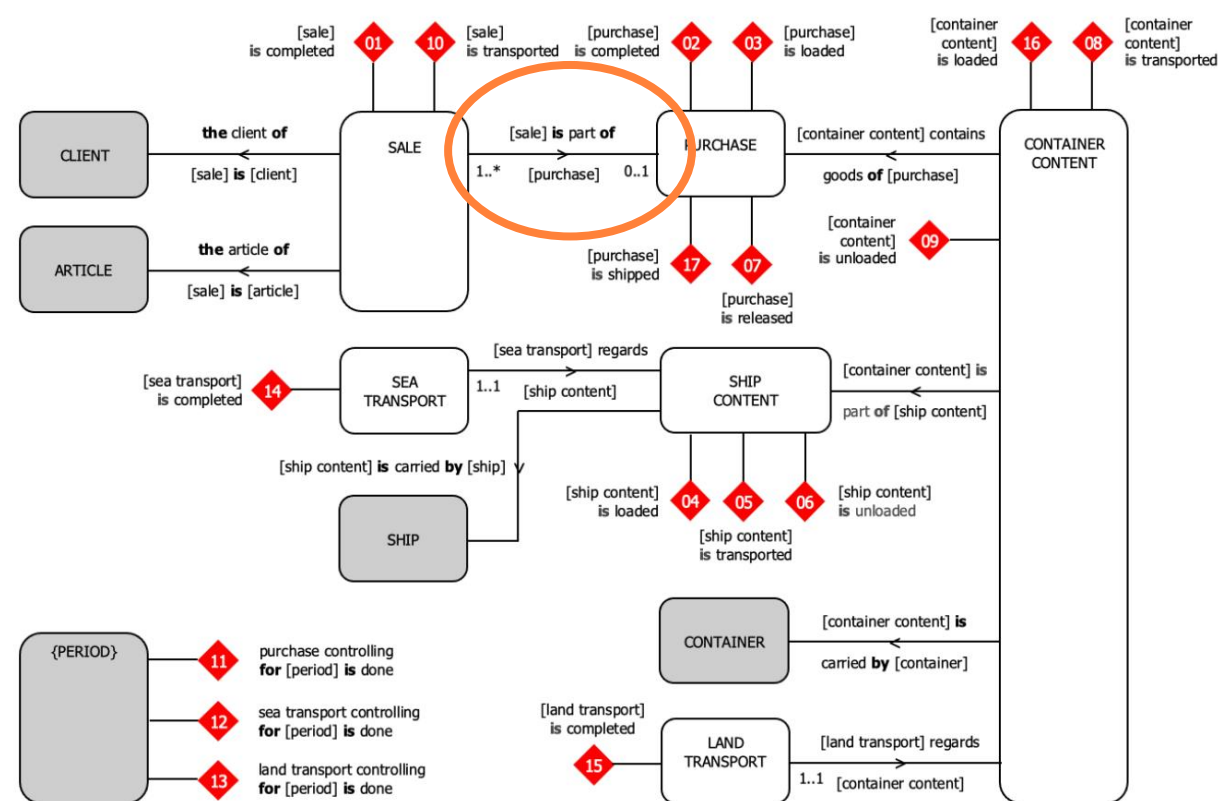

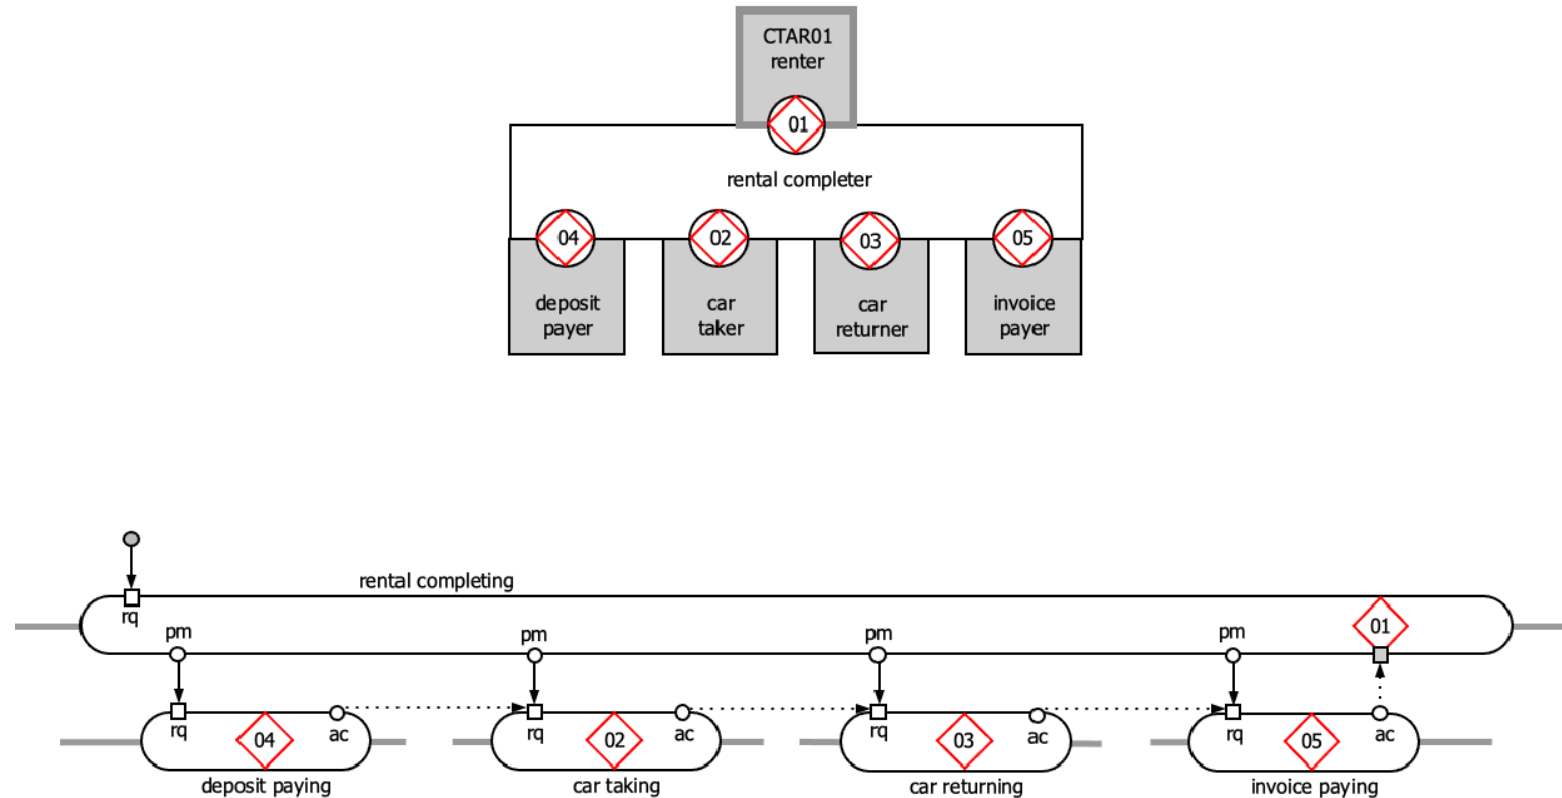

Fig. 18.16 OFD of the GloLog organization (2024 edition)

Intermezzo: RAC PSD (both versions, Ch. 15)

Example of minor change: RAC (ARS-1, Ch. 15)

when rental completing for [rental] is **requested**
(...)

(TK01/rq)

assess *rightness*: the performer of the request is the renter of [rental]

the addressee of the request is **some employee**

sincerity: *no specific condition*

truth: the starting day of [rental] is in the rental horizon of the year of
the starting day of [rental];

the ending day of [rental] is in the rental horizon of the year of
the starting day of [rental];

the ending day of [rental] is equal to or greater than the
starting day of [rental];

the duration of [rental] is less than or equal to the max rental
duration in the year of the starting day of [rental]

the expiration day of the driving license of the driver of [rental]
is equal to or greater than the ending day of [rental];

the number of free cars in the car group of [rental] on every day
between the starting day of [rental] and the ending day
of [rental] is greater than zero

if performing the action after then is considered justifiable

then promise rental completing for [rental] to the renter of [rental]

request deposit paying for [rental] to the deposit payer of [rental]

with the requested of rental paying for [rental] is Now

the requested deposit amount of [rental] is equal to

the standard deposit amount for the car group of [rental]

in the year of the starting day of [rental]

else decline rental completing for [rental] to the renter of [rental]

with *reason for declining*

(TK01/pm)

(TK04/rq)

(TK01/dc)

when rental completing for [rental] is **requested**
(...)

(TK01/rq)

assess *rightness*: the performer of the request is the renter of [rental]

the addressee of the request is **a rental completer**

sincerity: *no specific condition*

truth: the starting day of [rental] is in the rental horizon of the year of
the starting day of [rental];

the ending day of [rental] is in the rental horizon of the year of
the starting day of [rental];

the ending day of [rental] is equal to or greater than the
starting day of [rental];

the duration of [rental] is less than or equal to the max rental
duration in the year of the starting day of [rental]

the expiration day of the driving license of the driver of [rental]
is greater than the ending day of [rental];

there is a car in the car group of [rental] that is available
on every day between the starting day of [rental] and
the ending day of [rental]

if performing the action after then is considered justifiable

then promise rental completing for [rental] to the renter of [rental]

else decline rental completing for [rental] to the renter of [rental]

justification of declining

(TK01/pm)

(TK01/dc)

Major change: 'with' replaced by 'given'

when rental completing for [rental] is requested
 with the starting day of [rental] is some day
 the ending day of [rental] is some day
 the renter of [rental] is some person
 the deposit payer of [rental] is some person
 the driver of [rental] is some driver
 the invoice payer of [rental] is some person
 the car group of [rental] is some car group
 the pick-up location of [rental] is some branch
 the return location of [rental] is some branch

(TK01/rq) when rental completing for [rental] is requested
 given the starting day of [rental];
 the ending day of [rental];
 the renter of [rental];
 the driver of [rental];
 the car group of [rental];

(TK01/rq) when rental completing for [rental] is requested
 given the starting day of [rental];
 the ending day of [rental];
 the renter of [rental];
 the deposit payer of [rental];
 the driver of [rental];
 the invoice payer of [rental];
 the car group of [rental];
 the pick-up location of [rental];
 the return location of [rental];

Background: ALPHA (Ch. 11), devising the ontological model of the I-organization

Table 11.1 Example of an action rule from the case Rent-A-Car

event part	when rental completing for [rental] is <u>requested</u> with remember the starting day of [rental] is some day the ending day of [rental] is some day the renter of [rental] is some person the deposit payer of [rental] is some person the driver of [rental] is some person the deposit payer of [rental] is some person the car group of [rental] is some car group the pick-up location of [rental] is some branch the return location of [rental] is some branch rebmemer
assess part	share the <u>performer</u> of the <u>request</u> is the renter of [rental]; the <u>addressee</u> of the <u>request</u> is a rental completer; the starting day of [rental] is in the rental horizon of the year of the starting day of [rental]; the ending day of [rental] is in the rental horizon of the year of the ending day of [rental]; the ending day of [rental] is equal to or greater than the starting day of [rental]; the duration of [rental] is less than or equal to the max rental duration in the year of the starting day of [rental]; the expiration day of the driving license of the driver of [rental] is equal to or greater than the ending day of [rental]; the number of free cars in the car group of [rental] on every day in the rental period of [rental] is greater than zero erahs
response part	if <i>performing the action after then is considered justifiable</i> then remember <u>promise</u> rental completing for [rental] to the renter of [rental] <u>request</u> deposit paying for [rental] to the deposit payer of [rental] with the <u>requested</u> of rental paying for [rental] is Now; the <u>requested</u> deposit amount of [rental] is equal to the standard deposit amount for the car group of [rental] in the year of the starting day of [rental] rebmemer else remember <u>decline</u> rental completing for [rental] to the renter of [rental] with * reason for declining * rebmemer

Table 11.3 Example of an action rule in which a product is created

event part	when car returning for [rental] is <u>declared</u>
assess part	share the <u>performer</u> of the <u>declaration</u> is the driver of [rental]; the <u>addressee</u> of the <u>declaration</u> is some rental completer; the <u>declared</u> car of car returning for [rental] is the <u>promised</u> car of car returning for [rental] erahs
response part	if <i>performing the action after then is considered justifiable</i> then remember <u>accept</u> car returning for [rental] to the performer of the declaration the car of [rental] is returned remember else remember <u>reject</u> car returning for [rental] to the performer of the declaration remember

Apart from share → sha and remember → rem unchanged

Table 11.2 Example of an action rule from the case Rent-A-Car

event part	when rental completing for [rental] is <u>requested</u>
assess part	sha the <u>performer</u> of the <u>request</u> is the renter of [rental]; the <u>addressee</u> of the <u>request</u> is a rental completer; the starting day of [rental] is in the rental horizon of the year of the starting day of [rental]; the ending day of [rental] is in the rental horizon of the year of the ending day of [rental]; the ending day of [rental] is equal to or greater than the starting day of [rental]; the duration of [rental] is less than or equal to the max rental duration in the year of the starting day of [rental]; the expiration day of the driving license of the driver of [rental] is equal to or greater than the ending day of [rental]; the number of free cars in the car group of [rental] on every day in the rental period of [rental] is greater than zero ahs
response part	if <i>performing the action after then is considered justifiable</i> then rem <u>promise</u> rental completing for [rental] to the renter of [rental] mer else rem <u>decline</u> rental completing for [rental] to the renter of [rental] * justification of declining * mer

Major change: ALPHA (Ch. 11)

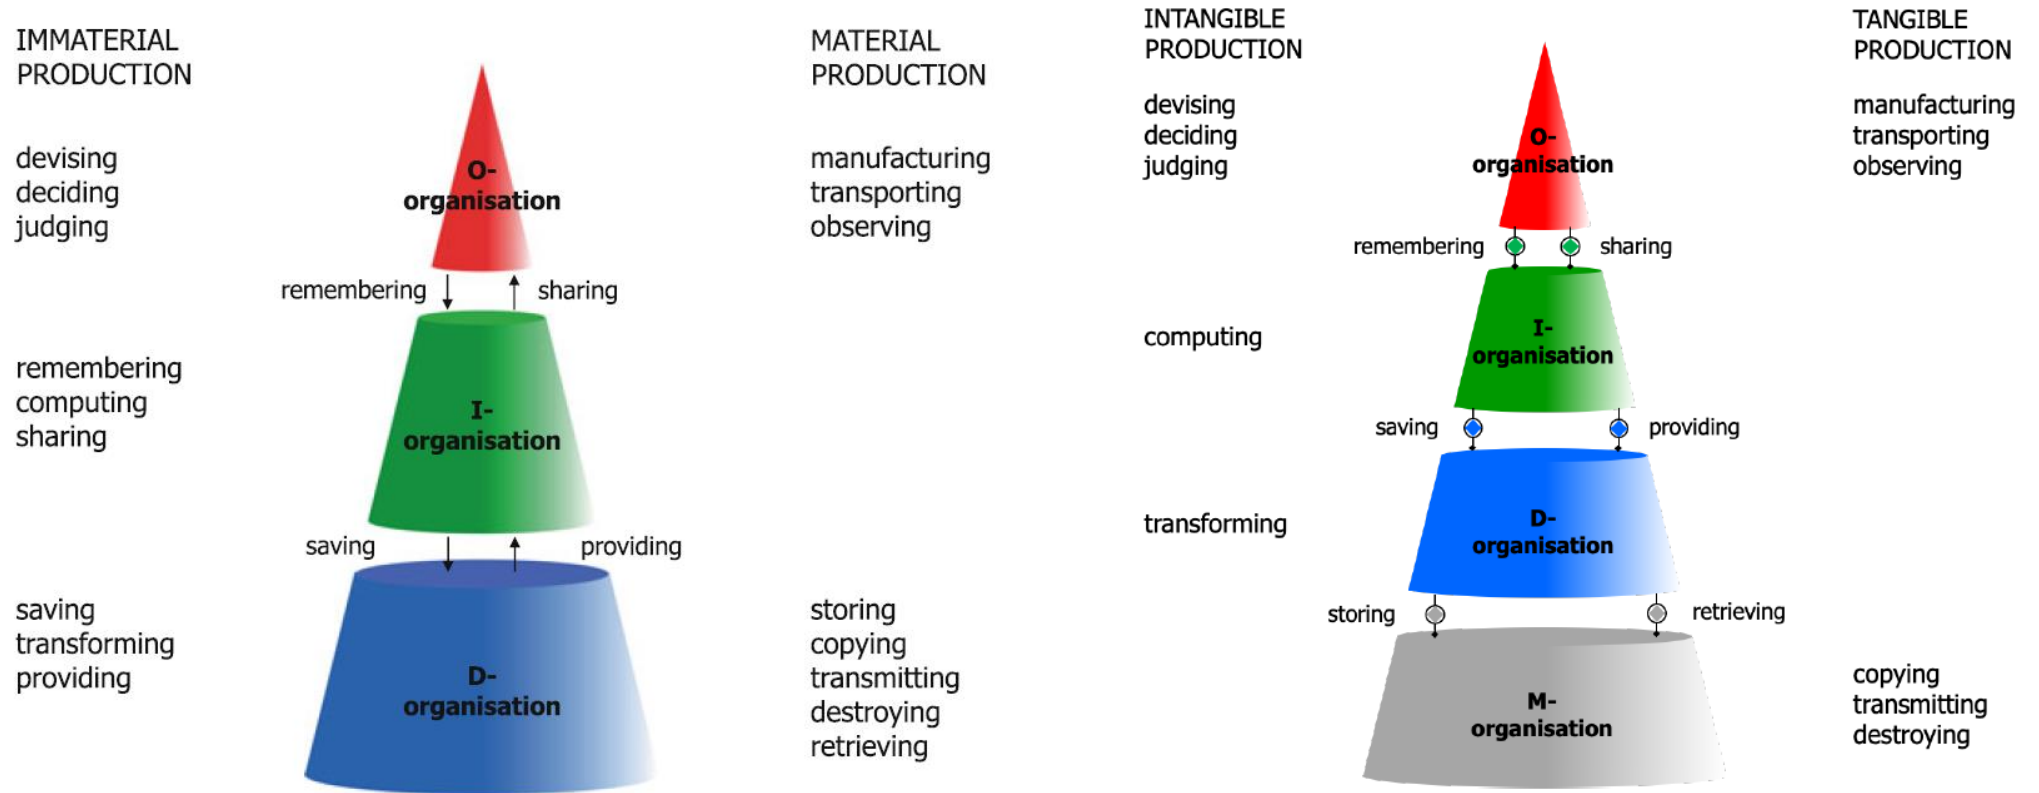

Fig. 11.4 Organisational layers and sorts of production

Fig. 11.4 Organisational layers and sorts of production

Real life application (Ch. 19): human interaction (UWV)

Key results

- Thorough understanding of the dole process
- Customer complaints and dissatisfaction are not treated as separate problem areas, but understood as integral part of the main business process
- Assignment of UWV employee to every case to improve customer contact and resolve 'automation issues'
- Decline and reject should be revocable as well

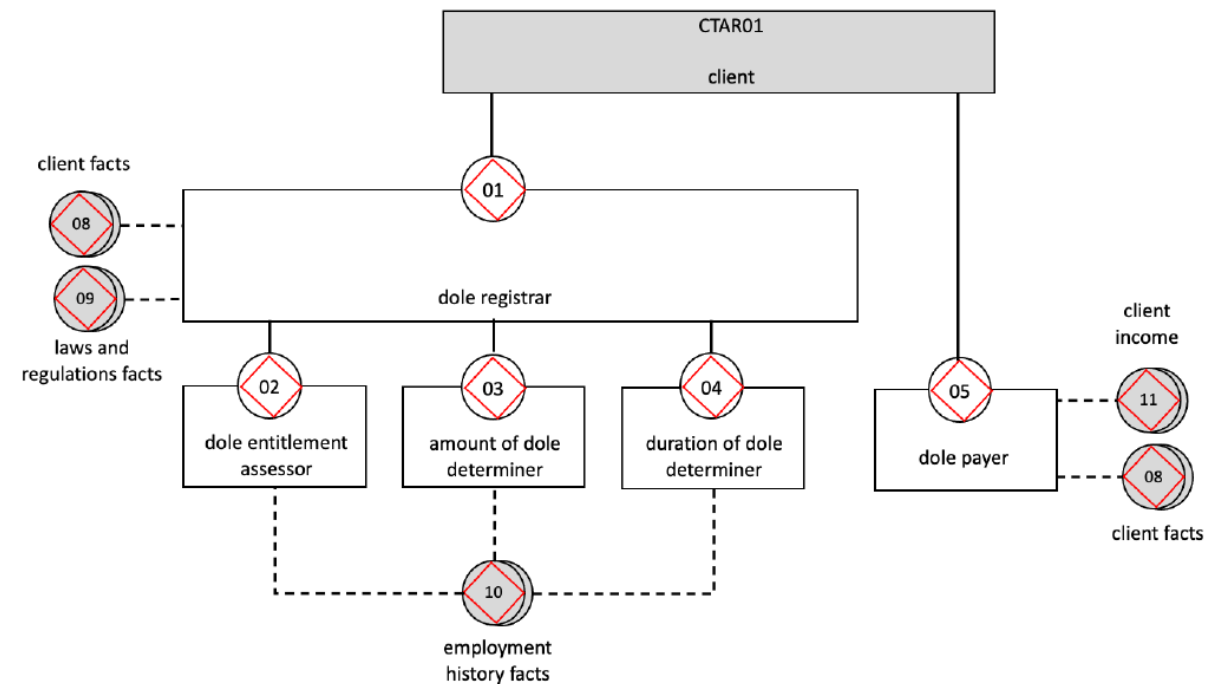

Fig 19.4 Coordination Structure Diagram of of UWV's Dole Process

By [Shakha Mirza](#), based on his master thesis at the Antwerp Management School

Major change: PSI (Ch. 8) allows revocations for decline and reject

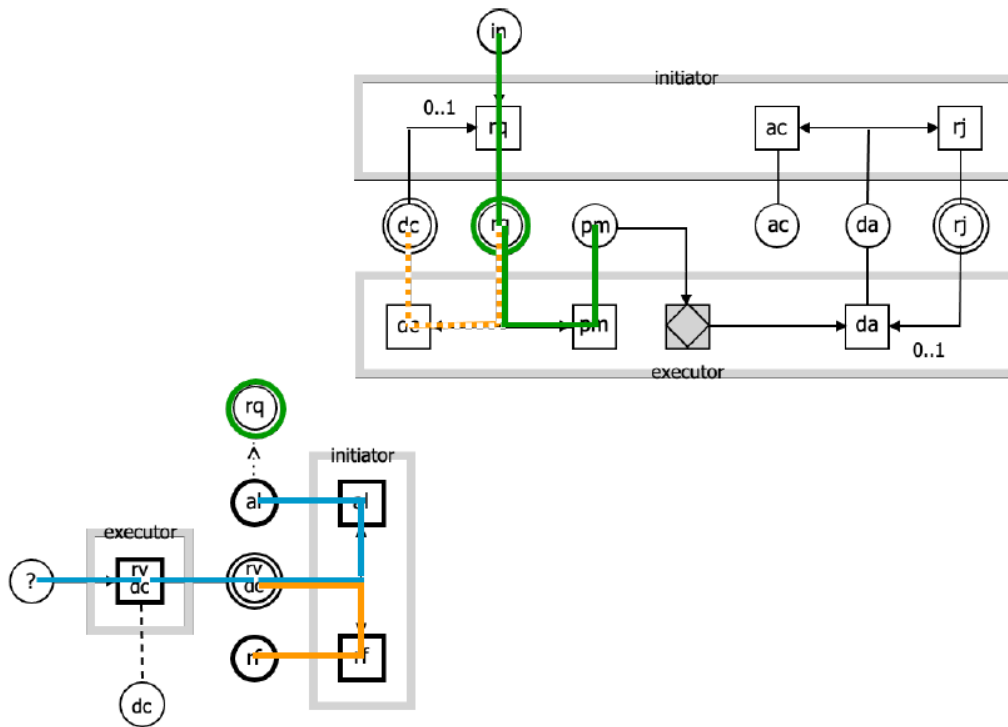

Fig. 8.14 The process of revoking a decline act

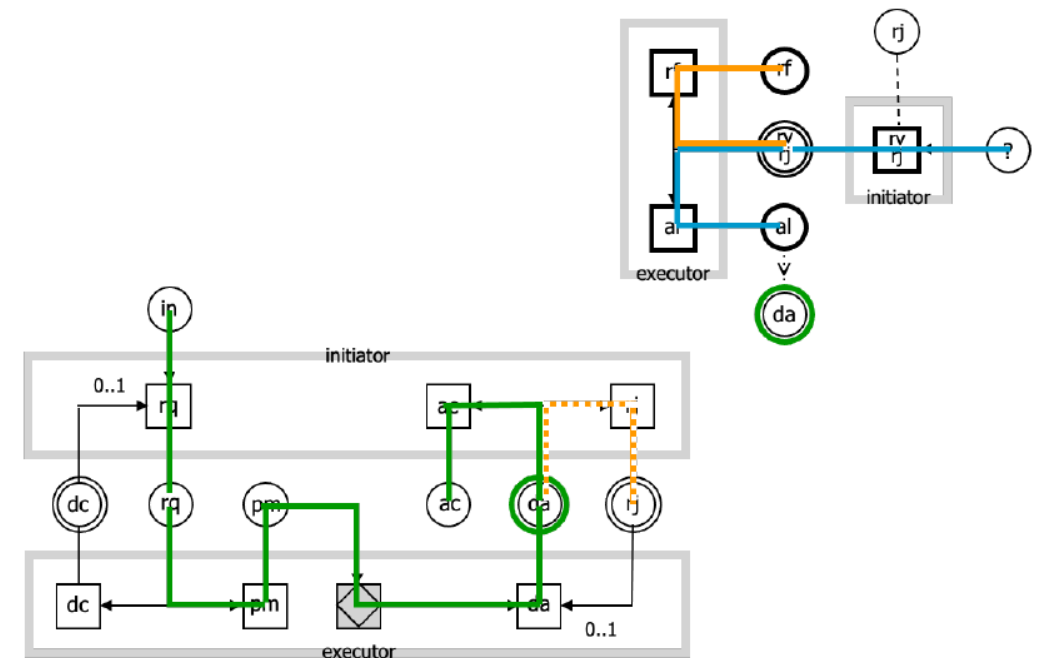

Fig. 8.16 The process of revoking a reject act
